Keep it safe 2 racing game 100

Source: Android Central We've collected the best racing games in the Google Play Store. With so many options to choose from, we've compiled a list that includes a whole sleathe of sub-genres - from stylized arcade racing to extremely realistic racing sims - so no matter your preference, you need to find an excellent game that's right for you. And if you want some great games in other genres, you've got the list of your favorite Android games overall as well. Ready? Let's go, let's go GRID Autosport brings console quality racing to Android without compromises in terms of graphics or games. The game offers some of the bestrendered graphics and textures that I've seen in a mobile game. The physics engine is dynamic and you will see real-time damage to your vehicle as you swap paint opponents in the corners. More than 100 cars to drive and the same number of tracks in the race across many disciplines - from open wheel and tour circuits to street drag races and multiple arcade style demolition races. GRID Autosport also allows you to choose how you want to compete with scalable difficulty, allowing for a lighter and arcade-style experience for casual gamers or ramped-up difficulty for fans craving pure racing simulation. Although the game does not provide nice flexibility for touch screen controls, you may want to take advantage of the support of the Bluetooth controller. It's simply better for physical control, and if you need to find a mobile game you've got it covered. It's unfortunate that NVIDIA Shield TV doesn't support it, as it should be perfectly suited to running a game like GRID, but these are the breaks. GRID Autosport is a premium game, but it's worth the money if you're looking for the best racing action for Android. GRID Autosport is a full-fledged racing game for Android that features a huge roster of cars to choose from and a lot of tracks and circuits to burn rubber down. Choose from more traditional racing modes, on the streets in drag or drift races, or crush them in a demolition derby. Nintendo making Mario Kart Tour free-to-play is as much a boon as it is a curse - it means that millions of people jump in and play without having to pay a penny, but it also means the game is carefully designed to entice you to sign up for your monthly Gold Pass and spend in-app currency to unlock more characters and rewards at a faster pace. The game itself is as frantic and chaotic as you'd expect from a Mario Kart game, and it's easily the most fun you've had in a mobile racing game for some time. In most ways, it doesn't look and feel like a real Mario Kart experience complete with item boxes and coins scattered throughout each course, fun shortcuts to explore and that familiar thrill of victory and more familiar sting defeat. However, despite the over-simplified controls, invisible bumper rails prevent them from deterring naturally and other restrictions that Nintendo Nintendo In many ways, the only new aspect of the Mario Kart Tour is that it can be played on a smartphone. There are fewer courses and characters available, and unlocking them would probably require cash than simply buying the latest Mario Kart game for the Nintendo Switch. But again, you won't have to spend money to enjoy Mario Kart Tour - until you start leveling against those players who have stuffed gobs out of it to upgrade their drivers and kart, of course. Mario Kart Tour allows you to play on some of your favorite racetracks as well as several new one directly from your phone. There are plenty of characters, armings, and items to unlock. Compete against others all over the world to see how well you match it! Asphalt 9: Legends is the latest entry in one of the most popular racing games available on the Google Play Store. This omits all the demands of realism, and an over-the-top, high-octane experience with all the fixings. Players can work (or pay) in career mode to unlock new tours or update the ones they

have. Compete against online opponents in eight-car races that are wild and fast. The controls default to TouchDrive, which allows you to focus on changing lanes to hit specific jumps or routes, drifting and nitro, while the game itself manages acceleration and steering. There are other control options as well, including on-screen controls and tilt steering, but honestly, it's best to start playing TouchDrive until you get a handle on the game. The incredibly polished graphics and excellent soundtrack to asphalt 9 adrenaline travel won't soon be forgotten. Download Asphalt 9: Legends (Free w/IAPs) Asphalt is one of the best racing franchises for mobile that features high octane racing with over 50 of the world's best racing cars. There is a complete career mode to enjoy wild arcade style racing action. Riptide GP: Renegade is the latest and greatest futuristic jet ski racing franchise for Android. Riptide GP: Renegade features a story-driven career mode that offers a quick race or fight against online opponents. The graphics are great for water and motion blur effects, so the game has a good sense of speed. It uses tilt-steering to control the hydro jet, which is less than ideal, but Bluetooth gamepads are also supported and things are smoother. Speaking of controls, one of the most important aspects of the game is pulling off crazy stunts that are easy to do with quick swipes. There are plenty to unlock and upgrade as you play in career mode, and AI is top notch, which is a real challenge like other racing games on Android. You will need a very good phone to handle the graphics and gameplay and play wonderfully in the NVIDIA Shield Android TV box. If you're looking for some tips before diving, check out the beginner's guide to Riptide GP: Renegade. Are you ready for a little wet? Riptide GP: Renegade is a stylish wave racer that is still one of the best looking racing games for Android. This game stands out from other racing games as you mingle with high speed car chases with the best elements of the endless running genre. Immediately, you are drawn to the great art style, which procedurally generated maps plot out the sidewalkside attractions and cities you need to pass the outlaw tour. You'll need to be a skilled driver to collect all the caps as you go, which you've spent unlocking your choice of 29 uniquely cool vehicles. Ending the mood is your anonymous companion, who reminds you every time you pass a gas station and comment on all nearby extensions. Although endless runners are often casual games, touch control requires full attention with quick inputs that help drive the car in tight spaces. Each car unlock has its own speed and handling, but you can master each one as you unlock them and race across three terrains - deserts, snow, and jungles - each with five city tours through it. The free version you download from the Play Store includes ads that you can watch to extend your run — or you pay for a one-time in-app purchase to remove ads and get permanent in-game bonuses. This is an endless driving game where you're on the run in several counties. All you have to do is keep your car fueled and avoid crashing while running down the police station — easier said than done! Horizon Chase is a fun retro style racing gameplay reminiscent of the classic 80s arcade racer pole position. Featuring bright and colorful retro graphics and more than 70 tracks spanning 32 cities, there's a lot of fun that was here. You start each race in the back of a 20 car pack and you have to weave your way past your opponents to get the crown. Keep winning to upgrade and unlock up to 16 available cars. You get to play the San Francisco numbers, but you'll have to pay to unlock the full game. Given how beautiful and fun this game is, we will. Horizon Chase is an ode to the arcade classics of old, with pole position run down the Cruis'n USA. The soundtrack is just plain awesome, and it all just feels like a kid again dropping in the quarter or starting up on my N64. Compete in horizon chase bright and colorful locations, a throw-back racer that provides fun arcade action with or without a controller. You want to race, but you only have one hand? Thumb Drift is the perfect game for you! Featuring charming graphics and a simple prerequisite, your goal is to drift sideways through four increasingly challenging courses. With more than 100 cars to buy via app purchases, or unlock random coins collected on the track or through special tricks, there are hours of mindless That he was here. Thumb Drift is the occasional, endless racer you've been waiting for. It's not exactly the most engaging or engaging racing game on this list, especially that the in-your-face of the IAPs is, is, sometimes a little mindless fun is worth the installation. There really aren't many other Thumb Drifts. Give him a chance if it sounds like something you'd enjoy. Featuring simple, one thumb controls, Thumb Drift is an occasional endless racing game that unlocks over 100 cars and drift through six unique tracks. Real Racing 3 is an impressive mobile racing game that is bound to keep hardcore gearboxes entertained. It puts real-brand cars on real tracks - hence the name - and includes an interesting asynchronous multiplayer system in which lap times are recorded by your friends and you race against a stick that drives at the time. Of course, you can bump them and affect your track time and have a single player career worth playing through as well. Over time, players will be looking for new cars and can upgrade various mechanical bits with their winnings, but make sure you can easily use the car - you need to keep the ride in good condition to avoid repair costs. Since this is an EA game, you can expect the usual sleath of microtransactions on offer. Including three different in-game currencies to achieve different things. It's a typical EA move and soured on an otherwise fun racing game for me, personally. Real Racing 3 is beautiful and the white racing action will keep you coming back for more. CSR Racing is a clean cut drag racing game. Players don't have to worry about steering — all they have to do is make sure it happens perfectly when their gear is converted. The indicators indicate when to shift next, and assuming the timing is up to snuff, and the ride is amply updated, you need to pull across the finish line before your opponent and earn some winnings. Premium currency can be used to buy high-end cars, while the standard currency can be used to purchase others, as well as upgrade parts such as gearbox, engine, intake, and body. There are a few more racing games in this franchise, including CSR Racing 2 and CSR Classics, but the first one is still the best in our books. CSR Racing boils down to drag racing with clear twitch reflexes. Featuring more than 100 licensed cars, all of which can be upgraded late and personalized, how far will that World Tour go? Top Speed was a very popular racing game back in its day, but the sequel takes things a not farthing. It comes standard multiplayer with over 70 car unlocks, plenty of customization and racing options, and much more. This is a racing game that packs a lot of what you expect, the only downside to the freemium model. You play as a disgraced cop who gets into the drag racing of the mafia. It sounds strange, but the story occupies second place in addition to high-octane racing. There are a lot of cars to choose from, as you have a name for yourself and work to get on leader in the city. Top Speed 2 offers some good road customization, but it's not without bugs. Lots of in-app purchases can be found here. You will be asked to spend money on refueling (endurance endurance Lootboxes are auto parts, and upgrades for cars. Everything feels pretty slimy, but the game itself is quite fun. The sequel to the popular Top Speed brings all the things you loved about the first game, just right. Drive over 70 cars, customize them and prove yourself the best racer around. How about instead of being the contestant, you want to control the contestants? Well, Motorsport Manager Mobile 3 does exactly that. You build your own racing team from scratch and compete in international events to become the best. You control everything from hiring drivers to upgrading cars. Strategy is the name of the game here, you can also work to get the most effective pitstop. You need to be prepared for anything, including weather changes and accidents. It's really quite a strong game, forcing you to take the whole picture of what's going on in a particular tournament. With the challenge constantly evolving to match your growing skills, Motorsport Manager Mobile 3 (what a mouthful) promises less high octane action than some other games on this list, but also offers an excellent experience that makes you excited to manage a racing team. Step out of the driver's seat and put on your manager's cap, it's time to build an entire racing team. Control all aspects, download training and updates. Source: Google Play Store Grand Prix Story is another race, although it has a very different feature and shape for Motorsport Manager Mobile 3. This pixel art adventure is more cutesy and fun - much less serious than mmm3. You still run a racing team instead of being a unique contender, but some of you might want that. If so, read on. It is not realism that is important here; it's about to have a fun time in a great art style. Since it's the manager, it's up to you to recruit and train drivers, build sponsorship deals, and ensure that your team wins as much as possible. Build new cars and parts to make sure you succeed. Grand Prix Story is a one-time purchase without ads or microtransactions. It's just a healthy, fun, and fun experience that puts you in the manager's chair. Another race sim, Grand Prix Story takes a whimsy and less realistic approach. Enjoy the cute art style while succeeding your team in the ultimate win! Another incredibly enjoyable game that is 100% free and no nonsense. Data Wing is a racing adventure in pure neon style. The visual style is striking, that's for sure, and I love every minute I've spent with the Data Wing. Touch control is absolutely accurate and incredibly sharp, the levels are amazing and have a high-ability ceiling. There's a funny story behind the Data Wing, a bit like the original Tron in some ways. You're probably going to finish pretty fast, but it's really fun to go back and do it again. The replay value here is high. This soundtrack is pretty good, too. Like Data Wing, and lacks the disadvantages and excuses I used to note. It's free and there are no enek ads or IAPs as well. Was. Excellent freebie, Data Wing is a beautiful racing adventure that takes obvious cues from Tron neonscape. It's a brilliant little game and worth playing. Beach Buggy Racing 2 is a bit like the classic Mario Kart or Diddy Kong Racing (who remembers that??). It's a wagon racer power-up and intense racing through unusual environments as you race to the top. But there is a little more content here to enjoy and work with than the classic style of gameplay. Not only can you collect cars and drivers — and there's a lot there for sure — but you can level up with power-ups that have plenty to choose from. There are a lot of game modes, including online competitive multiplayer, and so it will have more than enough to do. Beach Buggy Racing 2 is a fun racing experience and very evocating of the classics mentioned above. Although it's free-to-play, it's not super invasive with its monetization and since the game is so much fun, I don't feel badly supported by the developer. You're really just paying to speed up in-game progress. Beach Buggy Racing 2 brings back good old day console car racing games. It's cute, it's fun, and it's just a great time. It's hard to believe that I haven't heard of Nitro Nation Drag & Shift before, especially since it's ridiculous name because it seems very popular. So I decided to give it a go and knew almost immediately that I needed it here on this list and it comes from someone who doesn't usually like racing games. Because despite some in-app purchases, Nitro Nation, as it is referred to, strays away from the usual freemium pitfalls we see in these types of games (some of which are on this list, go figure). This is just an honest goodness racing game full of drag racing goodness, with IAPs for high-profile cars and game currency. There is an absolute ton to do with Nitro Nation, lots of cars to strive for, tuning, unlocking cosmetics and just a lot. It's almost depressing. And without the usual nonsense about energy systems, waiting time upgrades or anything, you can focus on enjoying the experience the game has to offer. I think you're going to love this. Despite its embarrassingly long name, Nitro Nation Drag & Shift is just a good drag racing game with a lot to do, lots of cars and cosmetics to unlock and some great games to enjoy. Dirt Trackin 2 is the sequel to the excellent Dirt Trackin (of course). It may not be quite a looker like some other games on this list, but there is a solid gameplay base, some types, and tournaments versus AI and other players. Plus, it's simple yet tight controls, which is all you can ask for in any racing game. There are plenty of customizations, five car models to choose from, career mode, and PvP. You can also play time races and a few other modes. This is a fun game to kill some time. Dirt Trackin 2 is a fun racing game with plenty of customization and plenty to do. Maybe it doesn't look like but it provides a solid foundation. A free-to-play, freemium game like others here, Hill Climb Racing 2 nevertheless presents a fun time for racing. There are a lot of vehicles to unlock, upgrades to buy, customization of both vehicles and characters, and a few different game modes (like Offline Adventure and Arcade). As you may have guessed the name, the game is all about climbing and descending hills as you race others. It's a simple game, but it's a lot of fun. I suggest you check it out if you like more whimsy car races because you can't find much realism here. Hill Climb Racing 2 challenges you to beat everyone at the top and bottom of hills. You would have to unlock a number of vehicles, buy upgrades, and customize them. Update December 2020: Added Dirt Trackin 2 and Hill Climb Racing 2 to our list! We can earn a commission on purchases using links. find out more. More.
